LIST OF CONTENTS

Numbers 1–2

Special Issue: Solar Activity of the Middle Atmosphere

J. Laštovička: Preface 1

L. Floyd, J. Newmark, J. Cook, L. Herring and **D. McMullin**: Solar EUV and UV spectral irradiances and solar indices 3

J. Bochníček and **P. Hejda**: The winter NAO pattern changes in association with solar and geomagnetic activity 17

I. Gabis and **O.A. Troshichev**: QBO cycle identified by changes in height profile of the zonal winds: new regularities 33

K. Labitzke: On the solar cycle–QBO relationship: a summary. 45

U. Langematz, A. Claussnitzer, K. Matthes and **M. Kunze**: The climate during the Maunder Minimum: a simulation with the Freie Universitä Berlin Climate Middle Atmosphere Model (FUB-CMAM) 55

M.P. Baldwin and **T.J. Dunkerton**: The solar cycle and stratosphere–troposphere dynamical coupling . . . 71

J. Laštovička: On the role of solar and geomagnetic activity in long-term trends in the atmosphere–ionosphere system 83

O. Troshichev and **I. Gabis**: Effects of solar UV irradiation on dynamics of ozone hole in Antarctica 93

A. Krivolutsky, A. Kuminov and **T. Vyushkova**: Ionization of the atmosphere caused by solar protons and its influence on ozonosphere of the Earth during 1994–2003 105

J. Laštovička and **P. Križan**: Geomagnetic storms, Forbush decreases of cosmic rays and total ozone at northern higher middle latitudes 119

K. Shibata and **K. Kodera**: Simulation of radiative and dynamical responses of the middle atmosphere to the 11-year solar cycle 125

J. Scheer, E.R. Reisin and **C.H. Mandrini**: Solar activity signatures in mesopause region temperatures and atomic oxygen related airglow brightness at El Leoncito, Argentina. 145

V. Zubov, E. Rozanov, A. Shirochkov, L. Makarova, T. Egorova, A. Kiselev, Yu. Ozolin, I. Karol and **W. Schmutz**: Modeling of the Joule heating influence on the circulation and ozone concentration in the middle atmosphere 155

K. Georgieva, B. Kirov, D. Atanassov and **A. Boneva**: Impact of magnetic clouds on the middle atmosphere and geomagnetic disturbances 163

G.R. Sonnemann and **M. Grygalashvyly**: Solar influence on mesospheric water vapor with impact on NLCs 177

B. Clemesha, H. Takahashi, D. Simonich, D. Gobbi and **P. Batista**: Experimental evidence for solar cycle and long-term change in the low-latitude MLT region. 191

D. Pancheva, Pl. Mukhtarov, N.J. Mitchell and **H.G. Muller**: Empirical model of the dynamics in the mesosphere and lower thermosphere region over the UK, including solar and geomagnetic activity. . . . 197

A. Ondrášková and **A.A. Krivolutsky**: Solar cosmic rays and changes in the polar middle atmosphere and ionosphere 211

Number 3

Y.A. Liou, A.G. Pavelyev and **J. Wickert**: Observation of the gravity waves from GPS/MET radio occultation data. 219

Ch. Jacobi, Yu.I. Portnyagin, E.G. Merzlyakov, T.V. Solovjova, N.A. Makarov and **D. Kürschner**: A long-term comparison of mesopause region wind measurements over Eastern and Central Europe 229

N.A. Kilifarska and **J.D. Haigh**: The impact of solar variability on the middle atmosphere in present-day and pre-industrial atmospheres 241

G. Dutta, B. Bapiraju, T.S.P.L.N. Prasad, P. Balasubrahmanyam and **H.A. Basha**: Vertical wave number spectra of wind fluctuations in the troposphere and lower stratosphere over Gadanki, a tropical station . 251

L.G. Evers and **H.W. Haak**: The detectability of infrasound in The Netherlands from the Italian volcano Mt. Etna 259

D.K. Sharma, J. Rai, M. Israil and **P. Subrahmanyam**: Diurnal, seasonal and latitudinal variations of ionospheric temperatures of the topside F region over the Indian region during solar minimum (1995–1996) 269

C.-H. Wen, J.F. Doherty, J.D. Mathews and **D. Janches**: Meteor detection and non-periodic bursty interference removal for Arecibo data 275

C.-C. Wu and **R.P. Lepping**: Relationships for predicting magnetic cloud-related geomagnetic storm intensity 283

C. David, S. Bekki, N. Berdunov, M. Marchand, M. Snels and **G. Mégie**: Classification and scales of Antarctic polar stratospheric clouds using wavelet decomposition 293

Number 4

C. Amory-Mazaudier, A. Kobea, P. Vila, A. Achy-Séka, E. Blanc, K. Boka, J. Bouvet, J.-F. Cécile, Y. Cohen, J.-J. Curto, M. Dukhan, V. Doumouya, O. Fambitakoye, T. Farges, C. Goutelard, E. Guisso, R. Hanbaba, E. Houngninou, E. Kone, P. Lassudrie-Duchesne, C. Lathuillere, Y. Leroux, M. Menvielle, E. Obrou, M. Petitdidier, S.O. Ogunade, C.A. Onwumechili, D. Rees, E. Sambou, M. Sow and **J. Vassal**: On equatorial geophysics studies: a review on the IGRGEA results during the last decade 301

A. Meza, M.A. Van Zele, C. Brunini and **I.R. Cabassi**: Vertical total electron content and geomagnetic perturbations at mid- and sub-auroral southern latitudes during geomagnetic storms 315

Q. Zhou, J.D. Mathews, Q. Du and **C.A. Miller**: A preliminary investigation of the pseudo-spectral method numerical solution of the Perkins instability equations in the homogeneous TEC case 325

D.J. Della-Rose: A graphical interpretation of the electrical conductivity tensor. 337

S.M. Smith, J. Friedman, S. Raizada, C. Tepley, J. Baumgardner and **M. Mendillo**: Evidence of mesospheric bore formation from a breaking gravity wave event: simultaneous imaging and lidar measurements . . . 345

R.W. Schunk, H.G. Demars and **J.J. Sojka**: Propagating polar wind jets 357

G. Jee, R.W. Schunk and **L. Scherliess**: Comparison of IRI-2001 with TOPEX TEC measurements 365

A.V. Pavlov and **N.M. Pavlova**: Mechanism of the post-midnight winter night-time enhancements in NmF2 over Millstone Hill during 14–17 January 1986 381

V.A. Mullayarov, R.R. Karimov, V.I. Kozlov and **I.N. Poddelsky**: Possible weekly variations in the thunderstorm activity 397

M.N. Vlasov, M.C. Kelley and **E.A. Gerken**: On the energy distribution of suprathermal electrons produced by HF heating in the F_2 region 405

S.R. Sharma, M. Fernando and **C. Gomes**: Signatures of electric field pulses generated by cloud flashes . 413

B.E. Jones, K.S. Jones, K.J. Rambo, V.A. Rakov, J. Jerald and **M.A. Uman**: Oxide reduction during triggered-lightning fulgurite formation 423

Number 5

R.P. Kane: North–south asymmetry of some solar indices 429

A. Lüdi and **A. Magun**: Refractivity structure constant and length scales from mm-wave propagation in the stably stratified troposphere 435

J.-M. Perrin, G. Thuillier, M. Ferhrenbach and **F. Huppert**: A comparison between radiative transfer calculation and pyranometer data gathered at Observatoire de Haute Provence 449

J. Tu, J.L. Horwitz and **T.E. Moore**: Simulating the cleft ion fountain at polar perigee altitudes 465

G.I. Pugacheva, A.A. Gusev, U.B. Jayanthi, N.J. Schuch and **W.N. Spjeldvik**: Cusp region radiation belts in the dayside magnetosphere 479

H.G. Demars and **R.W. Schunk**: Effect of the theta aurora on the polar thermosphere 489

D.E. Siskind, M.H. Stevens and **C.R. Englert**: A model study of global variability in mesospheric cloudiness 501

O.K. Obrou, J.O. Adeniyi, A.T. Kobea and **B. Moukassa**: Electron density profile parameters $B0$ and $B1$ response during a magnetic disturbance at equatorial latitude 515

Number 6

E.M. Blanter, M.G. Shnirman and **J.-L. Le Mouël**: Solar variability: evolution of correlation properties. . . 521

E.G. Merzlyakov, Y.I. Portnyagin, C. Jacobi, I. Fedulina, N.J. Mitchell, B.L. Kashcheyev, A.N. Oleynikov and **A.H. Manson**: On the day-to-day wind and semidiurnal tide variations at heights of the mid-latitude summer mesopause: zonal wavenumber estimations and its consequences, case-study in 1998 535

G. Sátori, E. Williams and **V. Mushtak**: Response of the Earth–ionosphere cavity resonator to the 11-year solar cycle in X-radiation 553

G.I. Gordienko, V.M. Aushev, I.N. Fedulina, S.S. Ryazapova and **M.G. Shepherd**: Observation of the F2-layer variability from the "Alma-Ata" observatory 563

S. Kumar, H. Chandra and **S. Sharma**: Geomagnetic storms and their ionospheric effects observed at the equatorial anomaly crest in the Indian Region. 581

A. Gholipour, C. Lucas, B.N. Araabi and **M. Shafiee**: Solar activity forecast: spectral analysis and neurofuzzy prediction 595

Q.H. Chang, G.T. Yang and **S.S. Gong**: Lidar observations of the middle atmospheric temperature characteristics over Wuhan in China 605

J. Scheer, E.R. Reisin, P.P. Batista, B.R. Clemesha and **H. Takahashi**: Detection of meteor radar wind signatures related to strong short-duration day-to-day airglow transitions at sites 2600 km apart 611

S. Jade, M.S.M. Vijayan, V.K. Gaur, T.P. Prabhu and **S.C. Sahu**: Estimates of precipitable water vapour from GPS data over the Indian subcontinent 623

D. Siingh, R.P. Singh, A.K. Kamra, P.N. Gupta, R. Singh, V. Gopalakrishnan and **A.K. Singh**: Review of electromagnetic coupling between the Earth's atmosphere and the space environment 637

O. Havnes and **F. Sigernes**: On the influence of background dust on radar scattering from meteor trails . 659

Number 7

R.G. Rastogi: Magnetic storm effects in H and D components of the geomagnetic field at low and middle latitudes 665

Y. Hobara and **M. Parrot**: Ionospheric perturbations linked to a very powerful seismic event. 677

L. Zhu, J.J. Sojka and **R.W. Schunk**: Active ionospheric role in small-scale aurora structuring 687

R. Pirjola: Averages of geomagnetically induced currents (GIC) in the Finnish 400 kV electric power transmission system and the effect of neutral point reactors on GIC 701

A. Bartzokas, H.D. Kambezidis, S. Darula and **R. Kittler**: Comparison between winter and summer sky-luminance distribution in Central Europe and in the Eastern Mediterranean. 709

J.F. Lemaire, S.G. Batteux and **I.N. Slypen**: The influence of a southward and northward turning of the interplanetary magnetic field on the geomagnetic cut-off of cosmic rays, on the mirror points positions of geomagnetically trapped particles, and on their rate of precipitations in the atmosphere 719

E. Séran and **J.-C. Cerisier**: Current layers: Influence of the finite size and non-uniform current distribution 729

J. Xu, A.K. Smith and **Q. Wu**: A retrieval algorithm for satellite remote sensing of the nighttime global distribution of the sodium layer. 739

Short Communication

S.M. Silverman: The earliest recorded aurora in North America since European colonization. 749

Numbers 8–9

Special Issue: Solar and Heliospheric Influences on the Earth's Weather and Climate

M. Füllekrug, N.B. Crosby and **J. Lilensten**: Solar and heliospheric influences on the Earth's weather and climate. 753

A. Zanini, M. Storini, L. Visca, E.A.M. Durisi, F. Fasolo, M. Perosino, O. Borla and **O. Saavedra**: Neutron spectrometry at high mountain observatories 755

R.G. Harrison: Columnar resistance changes in urban air. 763

K.L. Aplin and **R.A. McPheat**: Absorption of infra-red radiation by atmospheric molecular cluster-ions . . 775

H. Gleisner, P. Thejll, M. Stendel, E. Kaas and **B. Machenhauer**: Solar signals in tropospheric re-analysis data: Comparing NCEP/NCAR and ERA40. 785

H. Weng: The influence of the 11 yr solar cycle on the interannual–centennial climate variability 793

T. Neubert, T.H. Allin, E. Blanc, T. Farges, C. Haldoupis, A. Mika, S. Soula, L. Knutsson, O. van der Velde, R.A. Marshall, U. Inan, G. Sátori, J. Bór, A. Hughes, A. Collier, S. Laursen and **I.L. Rasmussen**: Co-ordinated observations of transient luminous events during the EuroSprite2003 campaign 807

H. Rothkaehl and **M. Parrot**: Electromagnetic emissions detected in the topside ionosphere related to the human activity 821

Number 10

L. Tong, Y. Hiraki, K. Nanbu and **H. Fukunishi**: Release of positive charges producing sprite halos 829

E. Echer, M.V. Alves and **W.D. Gonzalez**: A statistical study of magnetic cloud parameters and geoeffectiveness. 839

Q. Li, Y. Gao and **D. Han**: Analysis on magnetic storms reported by Beijing observatory 853

A.V. Pavlov and **N.M. Pavlova**: Causes of the mid-latitude NmF2 winter anomaly at solar maximum. . . . 862

K. Satheesan and **B.V. Krishna Murthy**: Modulation of tropical tropopause by wave disturbances 878

P.R. Nair, K. Parameswaran, A. Abraham and **S. Jacob**: Wind-dependence of sea-salt and non-sea-salt aerosols over the oceanic environment 884

S. Gladysz, M. Redfern and **B.W. Jones**: Shadow bands observed during the total solar eclipse of 4 December 2002, by high-resolution imaging 899

K. Kudela and **M. Storini**: Cosmic ray variability and geomagnetic activity: A statistical study 907

V.M. Krasnov and **Y.V. Drobzheva**: The acoustic field in the ionosphere caused by an underground nuclear explosion 913

V.M. Sorokin and **O.A. Pokhotelov**: Gyrotropic waves in the mid-latitude ionosphere 921

J. MacDougall and **D.C. Eadie**: The shape of midlatitude scintillation irregularities 931

Number 11

T. Killeen: Editorial 937

W. Lotko: Publisher's Note 939

P. Keckhut, C. Cagnazzo, M.-L. Chanin, C. Claud and **A. Hauchecorne**: The 11-year solar-cycle effects on the temperature in the upper-stratosphere and mesosphere: Part I—Assessment of observations 940

J. Hampson, P. Keckhut, A. Hauchecorne and **M.L. Chanin**: The effect of the 11-year solar-cycle on the temperature in the upper-stratosphere and mesosphere: Part II numerical simulations and the role of planetary waves 948

H.G. Mayr, J.G. Mengel, E.R. Talaat, H.S. Porter and **K.L. Chan**: Mesospheric non-migrating tides generated with planetary waves: I. Characteristics 959

H.G. Mayr, J.G. Mengel, E.R. Talaat, H.S. Porter and **K.L. Chan**: Mesospheric non-migrating tides generated with planetary waves: II. Influence of gravity waves 981

V. Kushwah, V. Singh, B. Singh and **M. Hayakawa**: Ultralow frequency (ULF) magnetic field anomalies observed at Agra and their relation to moderate seismic activities in Indian region 992

A.N. Afanasiev: The energy spectrum of spacecraft radio signals in the caustic shadow zone of the Sun: A new diagnostic of the solar coronal plasma 1002

S.P. Kshevetskii and **N.M. Gavrilov**: Vertical propagation, breaking and effects of nonlinear gravity waves in the atmosphere 1014

T. Tantisattayakul, K. Masugata, I. Kitamura and **K. Kontani**: Broadband VHF sources locating system using arrival-time differences for mapping of lightning discharge process. 1031

G. Jee, R.W. Schunk and **L. Scherliess**: On the sensitivity of total electron content (TEC) to upper atmospheric/ionospheric parameters. 1040

Number 12

Special Issue: Space Weather and RF Communications: Monitoring and Modelling

Lj.R. Cander and **B. Zolesi**: Space weather and RF communications: Monitoring and modelling 1053

B.W. Reinisch, X. Huang, I.A. Galkin, V. Paznukhov and **A. Kozlov**: Recent advances in real-time analysis of ionograms and ionospheric drift measurements with digisondes 1054

M. Pezzopane and **C. Scotto**: The INGV software for the automatic scaling of foF2 and MUF(3000)F2 from ionograms: A performance comparison with ARTIST 4.01 from Rome data 1063

N. Jakowski, V. Wilken, S. Schlueter, S.M. Stankov and **S. Heise**: Ionospheric space weather effects monitored by simultaneous ground and space based GNSS signals 1074

M. Materassi and **C.N. Mitchell**: A simulation study into constructing of the sample space for ionospheric imaging 1085

A. Belehaki, Lj. Cander, B. Zolesi, J. Bremer, C. Juren, I. Stanislawska, D. Dialetis and **M. Hatzopoulos**: DIAS Project: The establishment of a European digital upper atmosphere server 1092

B. Forte: Optimum detrending of raw GPS data for scintillation measurements at auroral latitudes 1100

R. Leitinger: Development of a database for the verification of trans-ionospheric remote sensing systems 1110

Lj.R. Cander and **S.J. Mihajlovic**: Ionospheric spatial and temporal variations during the 29–31 October 2003 storm 1118

R. Liu, Z. Xu, J. Wu, S. Liu, B. Zhang and **G. Wang**: Preliminary studies on ionospheric forecasting in China and its surrounding area 1129

I. Tsagouri, B. Zolesi, A. Belehaki and **Lj.R. Cander**: Evaluation of the performance of the real-time updated simplified ionospheric regional model for the European area 1137

A. Krankowski, W. Kosek, L.W. Baran and **W. Popinski**: Wavelet analysis and forecasting of VTEC obtained with GPS observations over European latitudes 1147

Number 13

Special Issue: Meteors and the Mesopause

J.S. Friedman and **D. Janches**: Special issue on meteors and the mesopause 1157

D.O. ReVelle: The Mesopause as a physical penetration boundary. 1159

L.P. Dyrud, L. Ray, M. Oppenheim, S. Close and **K. Denney**: Modelling high-power large-aperture radar meteor trails 1171

D.A. Mendis, W.-H. Wong, M. Rosenberg and **G. Sorasio**: Micrometeoroid flight in the upper atmosphere: Electron emission and charging. 1178

C.-H. Wen, J.F. Doherty and **J.D. Mathews**: Adaptive filtering for the separation of incoherent scatter and meteor signals for Arecibo observation data 1190

D. Janches and **J.L. Chau**: Observed diurnal and seasonal behavior of the micrometeor flux using the Arecibo and Jicamarca radars 1196

S. de la Peña, S.K. Avery, J.P. Avery, E. Lau and **D. Janches**: Wind measurements of MLT region using the Platteville, CO MEDAC 50 MHz meteor radar 1211

J. Xu and **A.K. Smith**: Evaluation of processes that affect the photochemical timescale of the sodium layer 1216

J. Höffner and **J.S. Friedman**: The mesospheric metal layer topside: Examples of simultaneous metal observations 1226

A.C. Aikin, J.M. Grebowsky, J.P. Burrows, J. Correira and **W.D. Pesnell**: Temporal evolution of the vertical content of metallic ion and neutral species 1238

Q. Zhou, J. Friedman, S. Raizada, C. Tepley and **Y.T. Morton**: Morphology of nighttime ion, potassium and sodium layers in the meteor zone above Arecibo 1245

Number 14

V.M. Sorokin, V.M. Chmyrev and **A.K. Yaschenko**: Theoretical model of DC electric field formation in the ionosphere stimulated by seismic activity 1259

V.M. Sorokin, N.V. Isaev, A.K. Yaschenko, V.M. Chmyrev and **M. Hayakawa**: Strong DC electric field formation in the low latitude ionosphere over typhoons 1269

M.Z. de Artigas and **A.G. Elias**: The equatorial stratospheric QBO and geomagnetic activity 1280

O. Mendes Jr. and **M.O. Domingues**: Lightning path simulation based on the stepped leader: Electrical conductivity effects 1287

P. Bencze: On the long-term change of ionospheric parameters 1298

T. Gulyaeva and **I. Stanislawska**: Night–day imprints of ionospheric slab thickness during geomagnetic storm 1307

J. Loureiro, J.T. Mendonça, A.L. Brinca, R. Fonseca, L.O. Silva and **I. Vieira**: Creation and expansion of a magnetized plasma bubble for plasma propulsion 1315

A. Kazantzidis, A.F. Bais, D.S. Balis, E. Kosmidis and **C.S. Zerefos**: Sensitivity of solar UV radiation to ozone and temperature profiles at Thessaloniki (40.5°N, 23°E), Greece 1321

M. El-Metwally: Sunshine and global solar radiation estimation at different sites in Egypt 1331

M.T.Y. Tadros, M. El-Metwally and **A.B. Hamed**: A comparative study on SPCTRAL2, SPCTR-1881 and SMARTS2 models using direct normal solar irradiance in different bands for Cairo and Aswan, Egypt . . 1343

P. Kolarž, J. Šekarić, B.P. Marinković and **D.M. Filipović**: Correlation between some of the meteorological parameters measured during the partial solar eclipse, 11 August 1999 1357

M.J.A. Bolzan, Y. Sahai, P.R. Fagundes, R.R. Rosa, F.M. Ramos and **J.R. Abalde**: Intermittency analysis of geomagnetic storm time-series observed in Brazil 1365

C. Amory-Mazaudier: Comments on the paper "Long term correlation between solar and geomagnetic activity" by E. Echer, W.D. Gonzales, A.L.C. Gonzalez, A. Prestes, L.E.A. Vieira, A. Dal Lago, F.L. Guarnieri, N.J. Schuch 1373

E. Echer, W.D. Gonzalez, A.L.C. Gonzalez, A. Prestes, L.E.A. Vieira, A. Dal Lago, F.L. Guarnieri and **N.J. Schuch**: Reply to comments on the paper "Long term correlation between solar and geomagnetic activity" 1375

Number 15

M. Mendillo, C.-L. Huang, X. Pi, H. Rishbeth and **R. Meier**: The global ionospheric asymmetry in total electron content 1377

Yu.P. Koshelkov, G.R. Zakharov and **B.M. Kiryushov**: Space and time variations of temperature trends in the Arctic stratosphere. 1388

D.A. Degenstein, R.L. Gattinger, N.D. Lloyd, A.E. Bourassa, J.T. Wiensz and **E.J. Llewellyn**: Observations of an extended mesospheric tertiary ozone peak. 1395

G.D. Parker: Timing patterns in event lists: Recurrent geomagnetic storms 1403

G.J. Fraser: The antecedents and subsequent development of scientific radar in New Zealand 1411

J.W. MacDougall and **P.T. Jayachandran**: Sporadic E at cusp latitudes 1419

D.V. Sarafopoulos: Cases for which the Earth's magnetosphere does not act as a "low-pass filter" 1427

D.K. Sharma, R. Chand, M. Israil and **J. Rai**: Variation of electron and ion temperatures ratio over the Indian region during the period 1995–1999 as measured by SROSS-C2 satellite. 1443

V. Sgrigna, L. Carota, L. Conti, M. Corsi, A.M. Galper, S.V. Koldashov, A.M. Murashov, P. Picozza, R. Scrimaglio and **L. Stagni**: Correlations between earthquakes and anomalous particle bursts from SAMPEX/PET satellite observations. 1448

Number 16

H.A. Bekerat, R.W. Schunk, L. Scherliess and **A. Ridley**: Comparison of satellite ion drift velocities with AMIE deduced convection patterns. 1463

A.J.G. Baumgaertner, A.J. McDonald, G.J. Fraser and **G.E. Plank**: Long-term observations of mean winds and tides in the upper mesosphere and lower thermosphere above Scott Base, Antarctica 1480

R.P. Singh, R.P. Patel, K. Singh and **A.K. Singh**: Observation of pulsing hiss at low latitudes. 1497

I.A. Barghouthi and **A.R. Barakat**: A Monte Carlo study of the generalized Coulomb Milne problem 1504

R.D. Sharma and **P.D. Dao**: A potential experiment for in-situ measurement of atmospheric temperature and atomic oxygen density in the 90–150 km altitude range by a Raman Lidar 1519

G.M. Giavis, H.D. Kambezidis, A.K. Basdekis, N. Sifakis, Z. Toth, A.D. Adamopoulos and **D. Zevgolis**: Cases of aerosol optical depth estimation in the Athens area, Greece 1524

A.A. Svoboda, J.M. Forbes and **S. Miyahara**: A space-based climatology of diurnal MLT tidal winds, temperatures and densities from UARS wind measurements 1533

H.K.M. Tanaka: Cosmogenic ion production rate in the high–middle–low altitude troposphere and its influence on the terrestrial cloud properties 1544

A.M. Hamza: On the relevance of fractal diffusion to auroral backscatter. 1559

M.A. Cabrera, R.G. Ezquer and **S.M. Radicella**: Predicted and measured slant ionospheric electron content. 1566

A. Kilcik: Regional sun–climate interaction 1573

Á Mika, C. Haldoupis, R.A. Marshall, T. Neubert and **U.S. Inan**: Subionospheric VLF signatures and their association with sprites observed during *EuroSprite-2003* 1580

R. Orús, M. Hernández-Pajares, J.M. Juan and **J. Sanz**: Improvement of global ionospheric VTEC maps by using kriging interpolation technique 1598

A.J. Carrasco, I.S. Batista and **M.A. Abdu**: The prereversal enhancement in the vertical drift for Fortaleza and the sporadic E layer. 1610

D.V. Blagoveshchensky, V.M. Vystavnoi and **M.A. Sergeeva**: HF radio propagation through the auroral oval during substorms 1618

S. Talpos, N. Rimbu and **D. Borsan**: Solar forcing on the ^{7}Be-air concentration variability at ground level 1626

L. Rivas Soriano, F. de Pablo and **C. Tomas**: Ten-year study of cloud-to-ground lightning activity in the Iberian Peninsula 1632

Numbers 17–18

Special Issue: 7th Latin-American Conference on Space Geophysics, Atibaia, SP, Brazil, March 29–April 2, 2004

B. Clemesha, C. Mandrini, P. Batista, I. Batista and **A. Chian**: Preface. 1641

M.A. Abdu, I.S. Batista, A.J. Carrasco and **C.G.M. Brum**: South Atlantic magnetic anomaly ionization: A review and a new focus on electrodynamic effects in the equatorial ionosphere. 1643

M. Stepanova, E. Antonova and **O. Troshichev**: Prediction of D_{st} variations from Polar Cap indices using time-delay neural network 1658

C.M. Denardini, M.A. Abdu, E.R. de Paula, J.H.A. Sobral and **C.M. Wrasse**: Seasonal characterization of the equatorial electrojet height rise over Brazil as observed by the RESCO 50 MHz back-scatter radar. 1665

J.R. Cecatto, A.C. Soares, F.C.R. Fernandes, F.R.H. Madsen, M.C. Andrade and **H.S. Sawant**: Radio emission observed in decimetric waves associated with the onset of CMEs. 1674

F.J.R. Simões Júnior, M.V. Alves and **F.B. Rizzato**: Energy mode distribution: An analysis of the ratio of anti-Stokes to Stokes amplitudes generated by a pair of counterpropagating Langmuir waves 1680

G.A. Mansilla, M. Mosert and **R.G. Ezquer**: Seasonal variation of the total electron content, maximum electron density and equivalent slab thickness at a South-American station. 1687

K.H. Tsui and **M.D. Tavares**: Self-similar evolution of the two-dimensional cylindrical magnetohydrodynamic flux rope 1691

J.F. Valdés-Galicia, A. Lara and **B. Mendoza**: The solar magnetic flux mid-term periodicities and the solar dynamo 1697

E. Correia and **R.V. de Souza**: Identification of solar sources of major geomagnetic storms 1702

B. Meléndez Oliveros, R. Martín Hernández and **L. Palacio Suárez**: On the onset and meridional propagation of the ionospheric F2-region response to geomagnetic storms. 1706

A. Borgazzi and **A. Costa**: Determination of intensity variations along coronal loops 1715

V.G. Ledenev, R.A. Sych, Y. Yan, Q. Fu, G. Huang and **H. Wu**: Fine structure of microwave emission in the 25 August 1999 event and its association with the magnetic field fine structure 1720

E.R. Rodríguez Flores, R. Gámez Díaz and **R.E. Rodríguez Taboada**: Spatial pattern of photospheric granules in a sunspot neighborhood 1728

M.L. Luoni, C.H. Mandrini, S. Dasso, L. van Driel-Gesztelyi and **P. Démoulin**: Tracing magnetic helicity from the solar corona to the interplanetary space 1734

G. Cristiani, G. Martínez, C.H. Mandrini, C.G. Giménez de Castro, M.G. Rovira, P. Kaufmann and **H. Levato**: Submillimeter-wave and Hα observations of the event on 28 November, 2001 1744

N.B. Trivedi, M.A. Abdu, B.M. Pathan, S.L.G. Dutra, N.J. Schuch, J.C. Santos and **L.M. Barreto**: Amplitude enhancement of SC(H) events in the South Atlantic anomaly region 1751

A.M. Gulisano, S. Dasso, C.H. Mandrini and **P. Démoulin**: Magnetic clouds: A statistical study of magnetic helicity 1761

A.F. Medeiros, H. Takahashi, R.A. Buriti, K.M. Pinheiro and **D. Gobbi**: Atmospheric gravity wave propagation direction observed by airglow imaging in the South American sector 1767

J. Fechine, A.F. Medeiros, R.A. Buriti, H. Takahashi and **D. Gobbi**: Mesospheric bore events in the equatorial middle atmosphere 1774

R.A. Sych, G.K. Matafonov, A.Ju. Belinskaya and **N.J. Ferreira**: The periodic spatial–temporal characteristics variations of the total ozone content 1779

H. Pérez-de-Tejada: Comparative outline of the region of interaction of the solar wind with the Ionosphere of Venus and Mars 1786

C. Bertucci, C. Mazelle and **M.H. Acuña**: Interaction of the solar wind with Mars from Mars Global Surveyor MAG/ER observations 1797

R. Carboni and **F. Frutos-Alfaro**: Computer simulation of convective plasma cells 1809

M. Stepanova, T. Vucina-Parga, E. Antonova, I. Ovchinnikov and **Y. Yermolaev**: Variation of the plasma turbulence in the central plasma sheet during substorm phases observed by the interball/tail satellite . . 1815

L.F. Morales, S. Dasso, D.O. Gómez and **P. Mininni**: Hall effect on magnetic reconnection at the Earth's magnetopause 1821

O. Mendes Jr., M. Oliveira Domingues, A. Mendes da Costa and **A.L. Clúa de Gonzalez**: Wavelet analysis applied to magnetograms: Singularity detections related to geomagnetic storms 1827

E.L. Rempel and **A.C.-L. Chian**: Alfvén intermittency in space plasmas 1837

M. José Alves Bolzan, R. Roberto Rosa, F. Manuel Ramos, P. Roberto Fagundes and **Y. Sahai**: Generalized thermostatistics and wavelet analysis of solar wind and proton density variability 1843

R.A. Miranda, E.L. Rempel, A.C.-L. Chian and **F.A. Borotto**: Intermittent chaos in nonlinear wave–wave interactions in space plasmas 1852

A. Ojeda, A. Calzadilla, B. Lazo, K. Alazo and **S. Savio**: Analysis of behavior of solar wind parameters under different IMF conditions using nonlinear dynamics techniques 1859

D.O. Gómez and **P. Mininni**: Numerical simulations of MHD dynamos 1865

A.S. de Assis: Auroral electron acceleration induced by Cherenkov damped waves 1872

M.V. Stepanova, E.E. Antonova, A.J. Foppiano, T.J. Rosenberg and **E.M. Ovalle**: Intermittency of riometer auroral absorption observed at South Pole 1876

Contents for Volume 67 1885
